The Lasting Benefits of Art for Your Child

Through art, children tell us who they are and how they think. With painting, drawing and sculpting, young children are given a way to communicate with us, long before they have all the words to do so.

- Art helps children build visual literacy, and supports their ability to identify shapes, colors and numbers.
- Artistic exploration helps children find inventive ways to problem solve, and strengthens fine and gross motor control.
- The songs, books and activities explored in art support critical thinking and imagination.
